ELSEVIER

Colloids and Surfaces
A: Physicochemical and Engineering Aspects 159 (1999) 539–541

COLLOIDS AND SURFACES A

Contents of Volume 159

Vol. 159 No. 1

Per Stenius: On his 60th birthday 1
The use of stagnation point adsorption reflectometry to study molecular interactions relevant to papermaking chemistry
L. Wågberg and I. Nygren (Sundsvall, Sweden) 3
Vapor pressures and amphiphilic association structures
S.E. Friberg, Q. Yin (Potsdam, NY, USA) and P.A. Aikens (Wilmington, DE, USA) 17
The influence of dextran derivatives on polyethylene oxide and polyacrylamide-induced calcium carbonate flocculation and floc strength
A. Gibbs, R. Pelton and R. Cong (Hamilton, Canada) 31
Spontaneous spreading of surfactant solutions on hydrophilic surfaces
M. Cachile (Buenos Aires, Argentina), A.M. Cazabat, S. Bardon, M.P. Valignat and F. Vandenbrouck (Paris, France) 47
The porous structure of paper coatings studied by water diffusion measurements
T.-Q. Li (CA, USA), M. Häggkvist and L. Ödberg (Stockholm, Sweden) 57
Flocculation of cationic polymers and nanosized partic1.les
A. Larsson, C. Walldal and S. Wall (Göteborg, Sweden) 65
Studies of serum protein adsorption at phospholipid surfaces in relation to intravenous drug delivery
M. Malmsten (Stockholm, Sweden) 77
Complexation between lignosulfonates and cationic surfactants and its influence on emulsion and foam stability
K. Magne Askvik, S. Are Gundersen, J. Sjöblom (Bergen, Norway), J. Merta and P. Stenius (Helsinki, Finland) . . . 89
A novel and simple method for determining the cationic demand of suspensions using chromophoric labeled cationic polymers
H. Tanaka and H. Ichiura (Fukuoka, Japan) 103
Adsorption of a divalent cationic surfactant onto a silica surface
C. Ström, B. Jönsson, O. Söderman and P. Hansson (Lund, Sweden) 109
Adhesion of silver particles on aluminum beads
V.V. Hardikar, D.V. Goia and E. Matijević (NY, USA) 121
Direct observation of surface effects on the freezing and melting of an n-alkane
N. Maeda and H. K. Christenson (Canberra, Australia) 135
Surface interactions in emulsions and liposome solutions
E. Blomberg, P.M. Claesson and T. Wärnheim (Stockholm, Sweden) 149
On the mechanically unstable free energy minimum of a gas bubble which is submerged in water and adheres to a hydrophobic wall
J.C. Eriksson and S. Ljunggren (Stockholm, Sweden) 159
Charge determination of synthetic cationic polyelectrolytes by colloid titration
S.-k. Kam (Cheju, South Korea) and J. Gregory (London, UK) 165
The hydrophobic force: the constant volume capillary approximation
V.V. Yaminsky (Canberra, Australia) 181
The effect of polymer and surfactant adsorption on the colloidal stability and rheology of kaolin dispersions
M. Sjöberg, L. Bergström (Stockholm, Sweden), A. Larsson (Uppsala, Sweden) and E. Sjöström (Stockholm, Sweden) 197
Synthesis and characterization of cationized latexes in dilute suspensions
J.B. Rosenholm, J. Nylund and B. Stenlund (Åbo, Finland) 209
Association in nonionic cellulose ether solutions due to microcrystallites?
K. Thuresson and B. Lindman (Lund, Sweden) 219

Calendar 227

Vol. 159 No. 2–3

Preface 229
Biological Systems
Ion transport in lipid bilayer membranes through aqueous pores
F. Bordi, C. Cametti and A. Naglieri (Roma, Italy) 231

Theory
Renormalization processes in the charge density of polymer colloids
M. Quesada-Pérez, J. Callejas-Fernández and R. Hidalgo-Álvarez (Granada, Spain) 239
Dispersions
Zeta potential, effective diameter and multimodal size distribution in oil/water emulsion
A. Wiącek and E. Chibowski (Lublin, Poland) 253
Measurement of the electrokinetic potential at reservoir rock surfaces avoiding the effect of surface conductivity
S.F. Alkafeef (Hadyia, Kuwait), R.J. Gochin and A.L. Smith (London, UK) 263
General
Investigation of dynamic Stern layer of liposomes by utilizing the isoelectric point and isoconducting point
H. Matsumura (Tsukuba, Japan), S.V. Verbich and S.S. Dukhin (Kiev, Ukraine) 271
Non Aqueous
Zeta potentials in nonaqueous media: how to measure and control them
M. Kosmulski (Åbo Akademi, Finland) 277
New Methods
Low-frequency AC electrokinetics
D.B. Pengra (Delaware, OH, USA) and P.-z. Wong (Amberst, MA, USA) 283
Theory
Dynamic electrophoretic mobility of spherical colloidal particles in concentrated suspensions: approximation of nonoverlapping double layers
H. Ohshima (Tokyo, Japan) 293
Contribution of electro-osmosis to electrorotation spectra in the frequency range of the β dispersion
V. Zimmerman, C. Grosse (Tucumán, Argentina) and V.N. Shilov (Kiev, Ukraine) 299
The influence of ionic strength on the dissolution process of silica
W. Vogelsberger, M. Löbbus, J. Sonnefeld and A. Seidel (Jena, Germany) 311
Materials Science
The influence of structural and morphological changes on the electrokinetic properties of PA 6 fibres
K. Stana-Kleinschek, S. Strnad (Maribor, Slovenia) and V. Ribitsch (Graz, Austria) 321
Characterization of fluorinated PAN-based carbon fibers by zeta-potential measurements
A. Bismarck and J. Springer (Berlin, Germany) 331
Basic and acidic surface oxides on carbon fiber and their influence on the expected adhesion to polyamide
A. Bismarck, D. Richter, C. Wuertz and J. Springer (Berlin, Germany) 341
Layer charge and electrophoretic mobility of smectites
F. Thomas, L.J. Michot, D. Vantelon, E. Montargès, B. Prélot, M. Cruchaudet and J.F. Delon (Vandœuvre, France) 351
General
Electrokinetic behavior in synthatic process of composite particles
K. Furusawa (Ibaraki, Japan) and O.D. Velev (Sofia, Bulgaria) 359
An experimental study on the influence of a dynamic Stern-layer on the primary electroviscous effect
F.J. Rubio-Hernández, E. Ruiz-Reina and A.I. Gómez-Merino (Malaga, Spain) 373
Electroviscous effect of rodlike polyelectrolytes in strong flow
S. Bor Chen (Singapore, Singapore) 381
Theory
Effect of interfacial state in bipolar membrane on rectification and water splitting
A. Tanioka, K. Shimizu, T. Hosono, R. Eto and T. Osaki (Tokyo, Japan) 395
Interaction
Influence of zeta-potential on the filtration efficiency of aqueous suspension on precoat filters
I. Leitschkis and W. Rammensee (Köln, Germany) 405
Poster
The dynamic and static electrophoretic mobility of paraffin particles dispersed in water
M. Alfridsson (Stenkullen, Sweden), M. Rasmusson and S. Wall (Göteborg, Sweden) 413
Fixed charge and transport numbers in isolated pepper fruit cuticles from membrane potential measurements: Donnan and diffusion potential contributions
J. Benavente, A. Muñoz, A. Heredia and A. Cañas (Málaga, Spain) 423
Influence of the external conditions on salt retention and pressure-induced electrical potential measured across a composite membrane
J. Benavente (Malaga, Spain) and G. Jonsson (Lyngby, Denmark) 431
ESA measurement for electrophoretic deposition of ceramic materials
A. Börner and R. Herbig (Freiberg, Germany) 439
Comparative electrophoretic mobility and streaming current study for ζ-potential determination
O. El-Gholabzouri, M.A. Cabrerizo and R. Hidalgo-Álvarez (Granada, Spain) 449
Pore-surface characterization of poly(acrylonitrile) membrane having amphoteric charge groups by means of zeta potential measurement
T. Jimbo, A. Tanioka (Tokyo, Japan) and N. Minoura (Ibaraki, Japan) 459

The role of water dissociation in concentration polarisation of disperse particles
N.A. Mishchuk (Kyiv, Ukraine) 467
A new method for the measurement of sedimentation potential: rotating column method
M. Ozaki, T. Ando and K. Mizuno (Yokohama, Japan) 477
Fluorine migration in a soil bed submitted to an electric field: influence of electric potential on fluorine removal
V. Pomes, A. Fernandez, N. Costarramone, B. Grano and D. Houi (Albi CT, France) 481
Polyelectrolyte adsorption onto planar surfaces: a study by streaming potential and ellipsometry measurements
S. Schwarz, K.-J. Eichhorn (Dresden, Germany), E. Wischerhoff and A. Laschewsky (Louvain-la-Neuve, Belgium) . . 491
Characterization of polyvinylpyrrolidone adsorption at inorganic soil components by a microelectrophoretic method
J.-M. Séquaris, F. Baßmann, A. Hild, H.D. Narres and M.J. Schwuger (Jülich, Germany) 503
The electrophoretic properties and stability of the cell suspensions
Z.R. Ulberg and L.G. Marochko (Kyiv, Ukraine) 513
Electrokinetic surface characterization of biomedical polymers — a survey
C. Werner, U. König, A. Augsburg, C. Arnhold, H. Körber, R. Zimmermann and H.-J. Jacobasch (Dresden, Germany) 519
